

**participants in constitution debate in Manica consider federation**      *(Text)* Several participants in the current draft constitution proposals debate at the party's Manica province committee headquarters support the idea of federation. Other participants oppose the idea, saying this would create uneven development nationwide because some of Mozambique's regions have been impoverished, and such a situation is inherent with federation. The debates are scheduled to end today and are attended by party and government officials and members of grass roots organisations and the defence and security forces. *(Radio Mozambique Maputo, in Portuguese 1030 gmt 6 Jun 90)*
