UNITED DEMOCRATIC FRONT OF MOZAMBIQUE

PROGRAMATIC SYNTHESIS

part C

As a consequence to the coup that overthrew the Port. Govt. in April 1974, Mozambique was handed over to the armed guerilla movement who represented total liberation: Frelimo.

Once in power, the first step taken by Frelimo was the elimination of all those who, during the ten years of Freedom struggle, had preached a non-aligned independence, I mean, out of Soviet or American imperialism.

The effects of this move were felt on high levels- such as the Central Committee (which was considered a moderate faction) - as well as in lower levels, such as the "bases", which, by pure idealism, caused the independence to be received with great enthusiasm.

It was not the desire of being rewarded that has transformed many former Frelimo guerillas into front-line anti-Frelimo fighters. It was the treason committed to our country by a communist minority. The dictatorship implanted in Mozambique is so ruthless to the extent of provoking in the people a strong wish to go back to Portuguese rule, what can be proved by the hoisting of Port. Flags and the singing of the Port. National Anthem, which off strong retaliatory action by Frelimo, often ending in the death by firing squad of the "reactionaries and enemies of the people", as they are labelled.

Right after independence, /prisons were packed to capacity with political prisoners something that had never happened in the darkest of Port. rule. This forced Frelimo to create concentration camps, prettensely known as "labour and recuperation camps", where people of both sexes and all ages, nationals or foreigners, are beaten up, tortured, violated and killed, suffering, innocent as they are, hunger, illness and all kinds of bad treatment.

Schools are all closed down with the exception of those whose "instructors" (most of them do not hold any certificate to qualify them as teachers) do little more than repeat the directive lines of the Party, thus taking the very young mozambicans to the paths of fear, violence, immorality and ridicularizing religion, turning them into easy victims of an ideology which awakens in them some of the lowest human instincts. There are in every classroom spy- pupils working for the party, whose function is to take notice of the slightest show of disagreement with the government.

The university of Mozambique was considered an enemy of Frelimo, for it helps culturally to the liberation of the people. So it was closed, and the students sent to the field in remote zones, The majority of them, however, has opted for Portuguese citizenship, thus trying to

We find it ridiculous Frelimo trying to recruit portuguese technicians to work in the country because Frelimo does not want any qualified mozambican technicians. That is why they have closed the University.

On the health field, Frelimo has expelled most of the doctors. Before independence, there were 3000 for 9 million people. Today, there are less than 20 for the same 9 million. It is known that those few work almost exclusively for top party members and their families. Meanwhile, the people die like animals in villages, in the streets, at the gates of hospitals or at home without medical assistance.

We know about several doctors who for having attend an emergency case at a patient's home, were later arrested and tortured. Such an attitude from a doctor is considered highly criminal.

On the field of justice, all private lawyers were nationalised. This in others words means the looting of all the values found in the offices of the attorneys by the guerrillas and the conveyance of same to Frelimo militants in court while keeping financially the families of those who were considered "terrorists". These days, if you are taken to Court then you have got no chance of defending your plight. Lawyers still in the country were forced to work for the Party and therefore must comply with its principles.

On the religious field, churches are never left in peace. Its members are arrested and tortured, for under such a repressive and violent government, they cannot remain silent. Today, they are considered highly undesirable and troublesome for the govt.

Most of those governing our country today, have no sound culture and their policy was not prepared honesty and seriously. Then lean heavily on the slogans learned in Moscow, and use the country as a counterpart for tremendous personal offerings which are made to them by international communism.

Samora Machel is the kind of finishing dog of Russian Imperialism which pretends at gunpoint impose political terror and the scheme of communist tyranny.

The non-discriminatory expelling from the country of the whites, chinese (non-communist) and indians has thrown large amounts of the population into unemployment, into the darkest poverty. To balance this, Frelimo compells the people to forced labour in the comunal fields sometimes in small plots between two buildings, right in the centre of the capital city. It is simply ridiculous. In such a vast territory, with such a low populational density.

Systems may be received with great joy by Russians, not by the Mozambique people. The result is: nothing is planted, nothing is produced. foreign aid is used in personal luxuries by the governors. ~~and live~~
