

*(Text)* At least 17 cholera cases have been detected in Tete Province. The provincial health director-general, Antonio Bomba, says the disease has already reached Moatize and Changara districts with eight and three cases, respectively. Six people have already died in Tete Province due to cholera. Health structures have been promoting cholera prevention campaigns in Tete city and some districts. *(Maputo home service in Portuguese 1730 gmt 19 Apr 89)*
