
MOZAMBIQUE-EEC ARB-E

Fishing Agreement 31/10/88

Under an agreement formalised in Maputo on September 30th, Mozambique is to allow vessels from the European Economic Community (EEC) to catch about 20,000t of fish and shellfish per year in Mozambican waters.

The agreement sets out rules for EEC vessels catching species including tuna, lobsters, prawns and crabs. The agreement also covers EEC assistance to the Mozambican fishing industry: the EEC will provide some \$27.5m for the purchase and installation of equipment needed to research Mozambique's fishery resources, and Mozambique will receive \$7.7m for fishery development projects. (R. Maputo 1/10)
