

War damage repair work in Mozambique's Manica Province

Maputo in Portuguese 1030 gmt 31 Oct 81

The Manica [Provincial] government has decided to elevate Machave locality to district status. Machave locality was completely destroyed by Ian Smith's troops in 1976. Actions by armed gangsters, supported by South Africa, have also affected the area in recent years. Reconstruction work on major social and economic infrastructures is underway at present - some of these are already in full operation. The development plan for Machave locality includes the building of a dam. A number of departments at provincial level are taking part in the reconstruction of Machave.
