JOHANNESBURG — The international board of inquiry's report into the air tragedy which killed Mozambique's President Samora Machel has been completed.

"The draft is already drawn up and is waiting to be signed," said the board's chairman, Mr Justice C. S. Margo, yesterday.

"According to international aviation law, the report must be sent to Mozambique and the Soviet Union. They then have 60 days to make a representation. Any representation must first be considered by the board before the report becomes public."
