Mozambique oppositionists in Europe hear minister 'scan 22/6/90

A Mozambican government delegation, led by Labour Minister Aguiar Mazula, this week attended a meeting with an opposition group of Mozambicans living in Europe and the US.

The group, who published a document they called the 'Cologne Manifesto' earlier this year, includes a number of individuals who are highly critical of the government, but who were received by President Joaquim Chissano during his recent visits to Portugal and France, reports the news agency AIM.
